Course Highlights

Pruning is the most common tree maintenance procedure and yet it is more than just the removal of deadwood.

In the Pruning module, emphasis will be placed on:

- Identifying the "Branch Bark Ridge"
- Pruning according to the ANSI A300 Standard Part 1
- Using the proper pruning tool for the task at hand; i.e., hand saw, hand pruner
- Making a "collar cut"
- 3 cut method for removing larger limbs
- Thinning techniques
- Directional pruning
- Subordinate pruning

A final exam will be given at the end of the course. Each participant will be given a small tree or ornamental to prune. The participant will be graded on the quality of the pruning technique (proper cuts - crossing, dying and dead limbs removed) in the given time frame.

Deadline for registration is April 18.

If you have any questions about the class, call Jeannie or Monica at 877-617-8887.

This class is worth 7 CEUs.
