## Course Highlights

This Advanced Training class will focus on the creation and implementation of an Urban Forestry Management Plan (UFMP) for public and private entities, or Tree Managers of any kind. Specifically, we will focus on the following topics:

- Creating a Needs Assessment for your organization
- Standards and BMPs that should be referenced by the UFMP
- Reviewing existing UFMPs for forward-thinking policies
- Drafting an outline of the management plan and its' objectives
- Holding a comment period for the public or other stakeholders
- Final creation of the plan, including goals and penalties for noncompliance
- Drafting supporting ordinances or bylaws to support the goals of the UFMP

There is no required reading or text for this course. That said, Management Planning is not a one-size-fits all pursuit, and can be very dependent on specific circumstances. Please come equipped with some specific questions and circumstances you would like to address for your organization, but might not know how to. We will include plenty of time for group discussion, questions, and a few exercises on how to get started with an Urban Forestry Management Plan that works for your organization, no matter what type or size.

**NO REFUNDS WILL BE GIVEN AFTER  
AUGUST 31, 2018.**
