

Location:

Palatine Park District
 250 E. Wood Street
 Palatine, IL 60067

Instructor: Steve Lane

What to expect from this class:**Day One:**

During the morning session, we will review plant taxonomy, nomenclature and morphology. We will also discuss approximately 35 tree species via a PowerPoint presentation. The afternoon session will consist of a "hands-on" field trip to put your ID skills into practice.

Day Two:

The morning classroom session will review an additional 40 tree species via PowerPoint presentation. The afternoon session will consist of another "hands-on" field trip to identify the remaining species.

Outcomes:

The arborist will become proficient in recognizing various plant features that will greatly improve their ID skills, especially during the summer period.

This class is worth 10 CEUs.

Deadline for registration is May 21, 2019.

No refunds will be given after the deadline.

Course Highlights

This IAA Advanced Training Course will provide an in-depth study of several significant tree species found in Illinois. The primary focus will be on leaf morphology, complexity and arrangement on both deciduous and conifer trees. This is one of the most important means of identification because of the many characteristics available for observation and comparison. Identification based on bud, stem, bark and fruit/seed characteristics will also be covered since they are important features necessary to complete a thorough summer identification.

Classes will consist of an indoor study session and an outdoor observation period where specific examples of trees studied in the classroom will be examined. Over 75 different tree species (deciduous and evergreen) will be studied during the course. A 20 question multiple choice quiz will be given at the end of the class.

Recommended Reading: *Manual of Woody Landscape Plants*, Michael A. Dirr, 1988. The member rate for the book is \$103 and the non-member rate is \$123 includes S/H.

About the IAA Advanced Training Program

This class is a required module for the Advanced Training Domain "Tree Site and Selection." This domain will provide additional training on proper tree selection, proper tree identification and knowledge of the site requirements for the tree.

A Certified Arborist interested in the Advanced Training Domain will need to complete four required modules plus one elective.

Tree Site and Selection Modules

Summer Tree Identification - Required
Winter Tree Identification - Required
Species Requirements - Required
Planting Methods & Selection - Required
Site Assessment & Design Principles - Elective
Soils & Nutrient Management - Elective
