

Tree Inventory: Options and Applied Use

Date: Saturday, May 4, 2019

Location:

Palatine Park District
250 E. Wood Street
Palatine, IL 60067

Instructor: Steve Lane

Learning Objectives:

We will focus on using inventory data to do things like create contracts and bid specifications, save money by looking at tree data, examine the benefits of trees, and manage tree risk in your organization.

Registration deadline is April 30, 2019.

If you have any questions about the class, you may email jeannie@illinoisarborist.org or monica@illinoisarborist.org or you can call the IAA office at 877-617-8887.

This class is worth 5 CEUs.

Course Highlights

Tree Inventories are one of the most important management tools a Forester has at their disposal. But knowing the options, uses, and limitations of your inventory can be an important consideration when deciding your management strategy for your organization.

Join us as we take a birds-eye view of what a tree inventory is and how it can be used in your organization, no matter what size or type. Please note, this course is meant to be a discussion of inventory concepts, and we will not be demonstrating or selling specific software here, but rather discussing the general options available to you, and how you can use these tools to make your forestry program more efficient.

We will focus on using inventory data to do things like create contracts and bid specifications, save money by looking at tree data, examine the benefits of trees and manage tree risk in your organization.

Registration deadline is April 30, 2019.
No refunds after registration deadline.

About the IAA Advanced Training Program

This class is a required module for the Advanced Training Domain "Urban Forestry." This domain will provide training and available resources on creating an Urban Forestry Management Plan for your organization.

A Certified Arborist interested in the Advanced Training Domain will need to complete five required modules plus one elective.

Urban Forestry Modules

Urban Forestry Management Planning- Required
Tree Inventories: Options & Applied Use - Required
Urban Settings, Species, Stresses & Strategies - Required
Tree Regulations & Legislative Concerns - Required
Tree Appraisals - Required
Public Relations & Community Outreach - Elective
Tree Risk Management in Urban Environments - Elective
