

AERIAL RESCUE • EMERGENCY RESPONSE

October 29, 2021 - 7:30-4:00 CST
Cantigny Park
1 S 151 Winfield Rd
Wheaton, IL

Aerial Rescue & Emergency Response Program

When a tree worker is injured or incapacitated aloft, typically fellow crew members are the first to respond. An emergency could develop at any time, and tree care professionals must know how to react.

TCIA's Aerial Rescue Training Program helps protect your workers and meet the aerial rescue training requirements mandated by ANSI Z133.1 and OSHA.

This certificate program is designed to be used in combination with on-the-job training and practice, so that crews have the knowledge and skills needed to evaluate an emergency situation and potentially rescue an injured tree worker. You must complete the workbook in order to receive a certificate.

Sponsors Welcome:

Sponsor event and display your products and services and interact with professional arborists.
